

The *Fiddler*™ Lift Truck

- ▶ Reduce your aisle widths.
- ▶ Create up to 40% more storage space.
- ▶ Handle long loads with less damage.
- ▶ Four-directional travel, heads-up display.

Handle long loads in short order. Now you can reduce storage space and handle long, bulky loads with less damage.

Lumber, drywall, fiberboard, furniture, pipe, and other big loads get moved more easily with the *Fiddler*™ lift truck.

The *Fiddler* lift truck's one-of-a-kind, four-directional travel mode – called *4-D*™ – eliminates the need to perform right-angle turns. Unlike typical counterbalanced trucks, the *Fiddler* truck's *4-D* capabilities allow you to create narrower aisles, denser storage – and retrieve long loads faster and more easily.

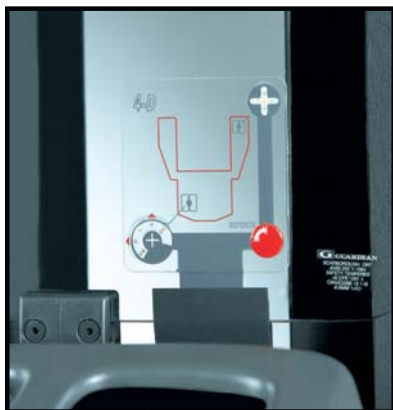

What's more, its 4,500 lb. capacity and rugged reach mechanism make it the smoothest and easiest to use in the business. And Raymond's single axis control handle lets you perform several functions simultaneously.

Place, pick, and move big loads delicately and smoothly. Handle them in short order with the *Fiddler* lift truck by Raymond.
